1. Requires Max. Trailer Tow Package. **2.** Requires Max. Trailer Tow and Heavy-Duty Payload Packages. Payload and towing ratings are independent attributes and may not be achieved simultaneously.

Payload Notes: Maximum capabilities shown are for properly equipped vehicles with required equipment and a 68-kg driver. Weight of additional options, equipment, passengers and cargo must be deducted from this weight. For additional information, see your Ford Dealer.

Towing Notes: Maximum loaded trailer weights shown. Do not exceed trailer weight of 2,268 kg when towing with bumper only. The combined weight of the towing vehicle (including options, hitch, passengers and cargo) and the loaded trailer must not exceed the GCWR (Gross Combination Weight Rating). Trailer tongue load weight should be 10-15% of total loaded trailer weight. Make sure that the vehicle payload (reduced by option weight) will accommodate trailer tongue load weight and the weight of passengers and cargo added to the towing vehicle. The addition of trailer tongue load weight, and the weight of passengers and cargo, cannot cause vehicle weights to exceed the rear GAWR (Gross Axle Weight Rating) or GVWR (Gross Vehicle Weight Rating). These ratings can be found on the vehicle's Safety Compliance Certification Label. See the RV and Trailer Towing Guide for requirements, restrictions and 5th-wheel towing.
